Carolyn,

Any times tomorrow that might be snow-proof?

We can do a TSCA call between 3:15 and 4pm, after that it's questionable...

TSCA program folks are available for a call this afternoon to discuss the reporting required (chemical vs. facility)- let me know if you want to have a TSCA-specific call, folks are available after noon. We received the EPCRA info. I forwarded yesterday from the state.

· Under the TSCA Chemical Data Reporting Rule, EPA received chemical data reporting for propylene glycol phenyl ether, or PPH, although none of the submitted information was claimed to be confidential business information (CBI). EPA also has toxicity data on this chemical because it was subject to the OECD Screening Information Data Set (SIDS) program.

- MCHM (CASRN 34885-03-5, “4-methylcyclohexanemethanol”)
- Put on original TSCA Inventory
- 1 public CDR report from Eastman Chemical
